Prices shown in *VW Designs* are the manufacturers' suggested retail prices and may change without notice or may vary at individual dealers. All prices are listed in U.S. dollars. In some instances, items will be available only at your dealership. This ensures proper handling and installation. Prices do not include painting, prep or installation costs. Some items may require installation kits at an additional cost. See your dealer for details. For return policy, shipping and handling charges and the most up-to-date pricing, visit vwdesigns.vw.com. The majority of our items are imported. For specific information, contact vwdesigns@vw.com.

A note about this catalog: Volkswagen of America, Inc., believes the information in this catalog to be correct at the time of printing. However, items, pricing, availability, specifications, features and colors are subject to change without notice. Some accessory applications may not fit because of equipment installed when your vehicle was built. Please ask your dealer for advice and verify that the accessories you have chosen are appropriate for your vehicle prior to installation. Vehicles in this catalog are shown with optional equipment. See your dealer for complete details on limited warranties and tires supplied by various manufacturers. Previous catalogs, product descriptions and price lists are no longer valid. Volkswagen of America, Inc., cannot be held responsible for errors in typography or photography.

† A note about our wheel and summer performance tire assemblies: Our alloy wheel and tire assemblies, as well as some of the tires required for our larger-diameter alloy wheels, are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy or icy weather conditions. If you drive under those circumstances, then you should equip your vehicle with all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all-season tire specified for your car or its equivalent. These high-performance tires also have a lower aspect ratio that aids performance and handling; however, in order to avoid tire, rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at recommended levels. Please also remember, in making your selection, that while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. For further information on all these topics, please consult the owner's manual or your local dealer, or call 1-800-DRIVE-VW.

New wheels: If you want to replace the wheels that were installed on the vehicle at the factory, then make sure that the new wheels are equipped with sensors which are compatible with the factory-installed, fire-pressure monitoring system, if applicable. The valve in each tire is equipped with a sensor which measures the pressure in the tire and transmits it to the fire-pressure monitoring system. New wheels with sensors are recognized and integrated into the system. For recognition to take place, the vehicle must be driven for a while at more than 15 mph (25 km/h) after it has been idle for about 20 minutes. If you are using tires with different inflation pressures than those recommended by the factory, the fire-pressure values must be reprogrammed. Please contact your authorized Volkswagen dealer or qualified workshop. If you mount wheels which do not have sensors or have incompatible sensors, then the system cannot recognize the wheels; the fire-pressure monitoring system is not able to measure inflation pressure, and a malfunction warning will be displayed.
